IT's Personal

With spring definitely on the way, the May edition of the Viglen Systems Price List is here, bringing you the very latest from Viglen's desktop range. At Viglen, we pride ourselves on offering the best combination of technology, performance and value and this month is no exception.

We understand that it can be difficult to make your choice from an endless range of specifications and features, so our desktop systems are designed to make the most of your budget without sacrificing the functionality you need. That's why at Viglen, whether you choose a fully featured Omnino with the latest Intel® vPro manageability built-in, or a suite of Genie desktops with our value-oriented Vig640M motherboard, you can be sure we'll guide your investment every step of the way.

Viglen - IT's Personal

Bordan Tkachuk
CEO Viglen LTD

Omnino III with Vig640M Motherboard

With its distinctive appearance, the Omnino III provides an ideal combination of performance and value with our Viglen Vig640M motherboard. Partnered with the Intel® H61 Express chipset on the motherboard, the Intel® Pentium Processor G620T supports 2.20GHz dual core performance, making this system ideal for any desktop. Better yet, the base unit and integrated 22" TFT display on the Omnino III are supplied by a single 80 PLUS Bronze power supply, so with an overall power consumption of less than 60 watts the Omnino III with Vig640M motherboard ensures lower capital and running costs.

Intel® Core™ i3 Processor i3-2120 3.30GHz, Dual Core with 3MB Cache

Genuine Windows® 7 Professional - OEM Licence

All-in-One chassis with small footprint

Intel® Express H61 Chipset

Windows® 7 Professional

Work anywhere more easily and securely

If you use your PC for work, you'll want Windows® 7 Professional. It can help you be more productive and protect the critical information you need to work with. Many routine tasks just take a couple of clicks, so you can spend less time setting up projectors, printers, and networks. Enhanced backup options can help you protect your hard work with automatic backups to your network. And with Windows® XP Mode, you can use most of your Windows® XP programs in Windows® 7.

Viglen recommends genuine Windows® 7.

The Omnino is Viglen's versatile All-in-One PC, created with the benefit of Viglen's three decades of design achievements. Drawing on our own experience as well as listening to our customers' requirements, the Omnino range combines the key vectors of performance, flexibility, style and value, resulting in an unprecedented desktop computer that's equally suited to single desk and whole organisation deployments.

Choose the Omnino III with its 20" height adjustable hard screen for stylish design encapsulating microATX flexibility and Intel® Core™2 Duo and Intel® Core™ i5 performance. Choose the Omnino 4 for all-in-one convenience with the flexibility of our full range of TFT monitors up to 22" without compromising performance.

Omnino 4

Viglen recommends genuine Windows® 7.

The Omnino 4 is Viglen's fourth generation of all-in-one computer. This radical PC has been designed from the ground up with the benefit of more than three decades of Viglen's experience and has been shaped by our customers' feedback.

The result is a truly versatile computer system with the flexibility to achieve a wide range of deployments and budgets. Its height-adjustable VESA mounting accommodates TFT displays from 15" up to 22" and the microATX form factor puts you in control of the specification.

For organisations that need access to a managed network, Windows® 7 Professional improves productivity both inside and outside of the office, helps protect critical data and connects in any networking environment.

For organisations that need access to a managed network, Windows 7 Professional improves productivity both inside and outside of the office, helps protect critical data and connects in any networking environment.
