Symantec Backup Exec 11d for Windows Server

The Gold Standard in Windows Data Recovery

Key Benefits

- ◆ Trusted and reliable
- ◆ Eliminates backup windows
- ◆ Enables faster backups
- ◆ Recovers individual files, Exchange messages/mailboxes and SharePoint documents in seconds
- ◆ Enables end user file retrieval - without IT intervention
- ◆ Complete disk-an and tape-based data protection
- ◆ Helps reduce operational cost in Microsoft Windows environments
- ◆ Increases Windows application availability
- ◆ Offers simple, scalable, centralised management
- ◆ Provides certified compatibility across Microsoft Windows 2000 and Windows Server™ 2003 environments.

Options

Symantec Backup Exec Advanced Open File Option

Helps ensure files on local or remote servers are protected while in use and are not skipped when running a backup job. The Symantec Backup Exec Advanced Open File Option handles open files at the volume level and is seamlessly integrated into Backup Exec software.

Symantec Backup Exec Library Expansion Option

Scales the media storage system by leveraging additional drives within multidrive tape or optical autoloader/library storage systems. This option's Advanced Device and Media Management (ADAMM) technology provides extensive configuration and management capabilities, including lights-out backup and restore operations and bar code reader and portal support for both SCSI and Fibre attached devices. Users can partition slots within a library to target backup jobs to a specific slot.

Symantec Backup Exec SAN Shared Storage Option

This powerful LAN-free backup solution allows multiple distributed backup servers to centralise storage devices that are connected over a switched fabric or iSCSI SAN for greater performance, efficiency, and fault tolerance. SAN Shared Storage Option load balances job activity across shared devices from multiple Backup Exec servers.

Symantec Backup Exec Intelligent Disaster Recovery Option

The Intelligent Disaster Recovery Option saves time by automating the traditional manual, error-prone process of system recovery. This tape-based system recovery solution automates server recovery, reducing the time to recover, and gets you back into business fast. Implement a server recovery solution for both local and remote Windows servers, eliminating the need to first reload the entire operating system of crashed servers.

Symantec Backup Exec Desktop and Laptop Option (10 Pack)

With the majority of business-critical information residing outside the data centre or off corporate servers, protection for desktops and laptops is a must. The Desktop and Laptop Option delivers continuous data protection to desktops and laptops whether in the office or on the road.

Symantec Backup Exec Central Admin Server Option

Simplifies management by providing concise information and centralised management of multiple Backup Exec media servers across the network. A robust and scalable solution, it enables centrally managed operations, load balancing, distributed catalogues, bandwidth throttling, fault tolerance, and monitoring and reporting for many Backup Exec media servers in a Windows data centre, distributed throughout the network or at remote offices.

Viglen & Symantec

Symantec Backup Exec Advanced Disk-based Backup Option

Enables faster backups and restores through advanced disk-based backup and recovery, including Synthetic and Off-Host backups to perform zero impact backups. Synthetic backups reduce backup windows and network bandwidth requirements and do not impact the original client.

Symantec Backup Exec NDMP Option

This new Symantec Backup Exec 11d Option supports the backup and restore of NDMP v.4/NetApp Filers with tape devices attached.

Agents

Symantec Backup Exec Agent for Lotus Domino Server

Integrates comprehensive data protection of vital Lotus Domino 6.x and 7.x messaging and collaboration databases within daily backup activities. The backup and restore of partitioned and clustered Lotus Domino servers are also supported (clustering with Microsoft Cluster Server).

Symantec Backup Exec Agent for Microsoft Exchange Server

This agent now includes continuous data protection for Exchange Server and revolutionises data protection and recovery by eliminating the daily backup window for Exchange backup jobs while still allowing recovery of individual messages, folders and mailboxes-in seconds.

Symantec Backup Exec Agent for Microsoft SQL Server

Continuous protection of SQL databases eliminates the daily backup window for SQL server and enables recovery of database transactions that have been made right up to the time of the hardware or software failure. Additionally, flexible recovery options allow IT administrators to restore SQL databases to destinations other than where they originated, directing a copy of the actual data streams being sent to media by a SQL database to a local directory for later use.

Symantec Backup Exec Agent for Microsoft SharePoint Portal Server

Recover critical data in seconds with the enhanced Agent for Microsoft SharePoint Portal Server (SPS). And now, individual documents can be restored from SharePoint Portal Server 2003, offering you quick recovery of only the specific file or version of a file that has been deleted or corrupted. Also, the SharePoint Agent has additional application support-now you can use the agent with SharePoint Services in addition to SharePoint Portal Server.

Symantec Backup Exec Agent for Oracle on Windows and Linux Servers

Integrate nondisruptive data protection for business-critical Oracle 10g and 9i databases. Use advanced features, such as the granular protection of individual table spaces or a complete application/database backup and the protection of archived redo logs and control files, without ever taking them offline. Supports Intel Xeon EMT64, Intel Pentium EMT64, AMD Athlon, and AMD Opteron processors. The new version also supports Red Hat and SUSE Linux.

Symantec Backup Exec Agent for SAP Applications

Provides SAP certified data protection for business-critical SAP applications while the application is still online and in use-supporting both Oracle and MaxDB database. The Agent for SAP is a reliable solution that allows Backup Exec software to provide both local and remote protection of databases using the SAP (BC-BRI BACKINT) interface for efficient data management.

Viglen & Symantec

Symantec Backup Exec Remote Agent for Linux or UNIX Servers

Provides high-performance networkwide data protection and recovery for 32- and 64-bit remote Linux and UNIX servers, including support for Intel Xeon EMT64, Intel Pentium EMT64, AMD Athlon, and AMD Opteron processors. This agent offers full or incremental, or differential, backup and restore for the following products:

- ◆ Red Hat
- ◆ Miracle
- ◆ Sun Solaris (SPARC)
- ◆ HP-UX
- ◆ Red Flag
- ◆ SUSE
- ◆ VMware
- ◆ NOES SUSE Linux

Symantec Backup Exec Agent for Microsoft Data Protection Manager

Provides high-performance networkwide data protection for the Microsoft Data Protection Manager, including SQL Server components.

Symantec Backup Exec Agent for Active Directory

Recover critical Active Directory data in seconds with this new agent. The Symantec Backup Exec 11d Active Directory Recovery Option allows you to restore Active Directory or Active Directory Application Mode (ADAM) objects, including deleted user accounts, and individual attributes online without having to perform an offline authoritative or nonauthoritative full Active Directory restore.

Symantec Backup Exec Remote Agent for MAC Systems

The new Symantec Backup Exec 11d Remote Agent for MAC Systems provides support for online nondisruptive backup of Mac OS X (PowerPC only) servers giving you the flexibility to protect your heterogeneous environment with Backup Exec.

Symantec Backup Exec Agent for Oracle RAC on Windows or Linux Servers

With this new Symantec Backup Exec 11d Oracle RAC Agent, protect an Oracle application server or business critical applications requiring high availability running within Oracle Real Application Clusters (RAC) on Windows and Linux servers.

Symantec Backup Exec Agent for DB2 on Windows Servers

The new Symantec Backup Exec 11d Agent for DB2 supports the backup and restore of IBM DB2 on Windows servers, allowing administrators to view logical objects (databases, table spaces) and select these entities to be recovered to a specified point in time.

Symantec Backup Exec Agent for Windows Systems

The Agent for Windows Systems includes the Remote Agent for Windows Servers and the Continuous Protection Agent. This agent expands network-wide data protection and optimises data transfers for 32- and 64-bit remote Windows servers, including local registry and system state information.

Symantec Backup Exec Remote Agent for NetWare Servers

The Remote Agent for NetWare Servers incorporates remote NetWare server data protection and recovery into daily backup and recovery activities. This agent offers 100 percent SMS compatibility and NDS bindery information for NetWare servers.
