

FileMaker Site License Agreement for Education & Non-Profit Organisations

Education Site License Agreement Programme

The Education Site License Agreement (ESLA) programme provides educational institutions and non-profit organisations with an easy and affordable means to deploy any combination of FileMaker products on every desktop throughout the entire institution. The ESLA program provides simple 100% site license coverage with easy budget management and no signed contracts. One year of maintenance is automatically included with each ESLA purchase.[†] Non-profit organisations will need to provide their registered charity number or proof of charity status.

Why Site Licensing?

- ESLA pricing is based on a 100% attachment for educational institutions and charities with as few as 50 computers or faculty/staff members. An eligible site is defined as a whole educational institution or stand-alone entity with a unique taxpayer ID number or equivalent. The ESLA is the most cost effective way to license the total number of computers or faculty/staff members in an organisation.

Example: If your school or organisation has 50 total computers and 79 total Faculty/Staff members, you could purchase a Site License Agreement for your whole site based on 50 computers (you purchase against the lesser of the two counts). Therefore, your price to cover your entire school on FileMaker products with one-year of maintenance included would be £3,200+VAT [50 x £64 = £3,200+VAT]

- FileMaker Pro, FileMaker Pro Advanced, FileMaker Server, FileMaker Server Advanced, and FileMaker Mobile are included with your purchase. You may deploy any combination of these products across your entire organisation.
- For Higher Education institutions, the ESLA allows for 100% student usage licenses so that the total student body is licensed for FileMaker Pro.
- Customised ESLA certificates are provided for the licensee. The non-transferable ESLA certificate details the terms and conditions, grants the right to use the number of software licenses purchased and acts as proof-of-purchase in future transactions.
- One ESLA installation code for each product is provided under the ESLA. Home and portable use rights are also included for FileMaker Pro and FileMaker Mobile.
- All FileMaker licenses are now delivered via Electronic Download. Licensing orders include the software product and electronic documentation as PDF files. CDs and printed manuals are available at an additional charge.
