

Introducing Learn Anywhere[®] The universal laptop scheme

With Learn Anywhere[®] your students can be learning everywhere

At Viglen, IT's personal.

Benefits at a glance

- Improve learning outcomes
- Introduce e-learning right across the curriculum
- Re-engage disillusioned students
- Encourage parents to take a stake in their child's education

It couldn't be easier

- Get up and running quickly
- See better results lead to more funding and expansion
- Minimise the risk to your institution with inbuilt insurance cover
- Schedule payments to suit income patterns
- Relax – we'll handle the administration

Working in partnership with schools and LEAs, we are pioneering to bring ICT directly to the desks of students across the UK. As well as wireless networks, cost-effective yet powerful PCs, and the unique home/school access package, myClassLink™, we also offer the pioneering student laptop scheme, Learn Anywhere. A parental contribution scheme, it allows schools to offer laptops where they are needed – and parents to see the advantages immediately.

The case for laptops

The academic case for introducing laptops is clear – they can improve learning outcomes, re-engage disillusioned students and allow you to introduce e-learning across the curriculum.

To maximise the benefits of ICT, however, all students in a class should have equal access. That access also needs to be sustainable so that future year groups can enjoy similar benefits. And any such scheme has to be easy to promote to parents and simple to administer.

Viglen Finance has all the answers

Whether it's the Dossier range of notebook PCs or the exciting new eXaro™ Tablet PC, Viglen Finance offers mobile computing without compromise, giving students access to content-rich technology and bringing learning to life.

For maintained or independent schools, further education colleges or universities, the benefits are just as compelling. Learn Anywhere includes a finance package that is easy to implement and manage, leaving you free to concentrate on using the technology to create results. Learn Anywhere enables you to:

- Acquire the laptops you need with no up-front payment
- Choose a 2, 3 or 4 year lease with payments structured to suit you
- Leverage contributions from parents or students to help fund the acquisition, with ongoing administrative support for the collection of payments from parents or students
- Minimise risk through built-in insurance that protects you against a future financial shortfall between contributions and payments
- Get up and running quickly and easily

The choice is yours

Although you might have the resources to buy laptops outright, deploying hundreds of machines across your school or college represents a significant investment, even with a phased implementation.

Learn Anywhere is a better option because through leasing it makes acquisition affordable and spreads the cost over the useful working life of the laptop. It also adds yet more advantages because it includes advice on working with parental contribution schemes – and a payment management option that removes much of the administrative burden.

Once the scheme is in place, your students could be using laptops in the classroom, in the recreation room, at home, on holiday – in fact, anywhere – within days.

And at every step, you'll be in control of the scheme. You choose the equipment you want from the wide Viglen range on offer. You select the insurance cover that best suits the balance you want between risk and affordability. You decide the way parents contribute, how you structure the lease facility and when you start.

Any questions?

With ICT essential in schools and colleges, now is the time for laptops to take their place at the heart of the curriculum. Learn Anywhere gives you an easy, affordable and simple to manage route to make it a reality.

Viglen Finance can help you. Our team of consultants are experienced at working with schools and colleges on ICT issues. We know the pressures you face. We appreciate that budgets are tight. We can answer any question and make the transition to a Learn Anywhere environment easier.
