Cohaero brings together numerous school systems into a single entry point, accessible from a web browser. Log on with your school username and password just once to gain access to information from a variety of school systems without having to logon to each of them individually.

Key features:
- SharePoint 2013-based running on Windows Server 2012 and SQL 2012 (all the latest technologies)
- Supports Windows 8, Windows 7 and legacy XP client machines
- Integrates with the schools MIS system for user creation
- Accessible from anywhere in the world with a web browser.
- Mobile device support including iOS and Android tablets / phones
- Windows 8 app
- Dynamic, constantly evolving system that can be deployed in a phased approach.
- Work together on integrating future products and systems as your needs evolve.
- Cohaero delivers enhanced learning and time saving opportunities in schools through the use of better-managed data, knowledge and resources.
