

Integra

Multi-role versatility in an ultra small form factor.

integro

Viglen Personal Computers are
manufactured by XMA in the UK

Versatile

The Viglen Integra is designed on the mini-ITX form factor, ideally suited to ultra small PCs. A range of compact, feature-rich motherboards offers a range of configurations to fit your demands of budget, connectivity, manageability, performance and lifecycle.

Hybrid

The flexible configuration and compact size of the Viglen Integra makes it an ideal platform for hybrid computing. Choose a traditional CPU/hard drive spec for local computing, or a lean, power-efficient build to deploy the Integra as a thin client, thus simplifying deployment and maximising security and availability.

Environmental

As part of your green computing strategy, the Viglen Integra is a key player. Developed within Viglen's ISO 14000 certified process, the physically smaller Integra chassis reduces raw material consumption, while its carefully selected configurations minimise energy consumption with the latest Intel power saving technology. The 80 PLUS power supply ensures that at least 85% of the electricity supplied is used for active computing, to maximise its green footprint. You can even re-use your existing TFT

display panels, avoiding waste and making the most of your precious budget.

Display

Modern IT users demand more from their monitor and the Integra doesn't disappoint. It's compatible with a range of TFT displays from 17" up to 24" widescreen including hard screen and touch screen devices to further broaden its appeal. The monitor stand is height and tilt adjustable to accommodate ergonomic requirements, making the Integra suitable for dedicated and hotdesking environments.

Utility

Viglen has designed the Integra to perform as well as it looks, both as an element of your IT solution and as a workplace tool. Forward facing USB and audio ports allow simple connection of peripherals and the DVD drive and digital memory card reader ensure that information can be effortlessly shared. The convenient carry handle simplifies deployment allowing for rapid installation with a minimum of physical effort.

Security

Security matters and the Viglen Integra has been designed from the start to make it easy to secure through a range of features to

match your existing security policy. We've included a Kensington-style security locking point which can anchor the base unit to the desk and keep the back cover locked, as well as options for a desktop locking pillar, internal chassis lock and cover and monitor security screws, allowing you to protect your investment without compromising its flexibility.

Multimedia

Modern users demand full multimedia support from their computers and the Integra doesn't disappoint. All models feature an integrated sound card and dedicated stereo speakers built into the monitor, providing a clear audio image. For quiet deployments, the speakers can be easily disconnected within the lockable cable cover while retaining the use of the front-facing headphone socket.

Flexible

The Viglen Integra has been designed to maximise deployment diversity, while maintaining a common hardware platform. Equally suited to single user, classroom, office or administrative use, the Integra can be rapidly redeployed for alternative use as a thin client with minimal reconfiguration, further protecting the value of your IT investment.

Specification

- **Motherboard**
Choice of mini-ITX form factor
- **Operating System**
Windows® 10, Windows 8 / 8.1, Windows 7 Professional
- **Processor**
Intel® Core™ i3, i5 or i7 and Pentium®
- **Memory**
Up to 32GB 2133MHz DDR4 or 1600MHz DDR3*
- **Hard Drive**
2.5" Serial ATA Solid State Drive or hard drive (options up to 1TB)
- **Audio**
Integrated HD audio
- **Network**
Integrated Gigabit Ethernet Adapter
- **Graphics**
Integrated Intel® HD graphics
- **Optical Drive**
Internal DVD ReWriter Drive (optional internal multi-format Card Reader)
- **Input**
105-key USB keyboard and optical mouse with optional upgrades
- **External Ports**
Front-Facing USB and audio*
- **Power Supply**
250W 80 PLUS
- **Security**
Standard: Base unit and monitor Kensington locking point.
Optional: Security pillar, secure cable loop, secure monitor and rear cover screws
- **Display**
75mm/100mm VESA mount, supporting a range of displays from 17" to 24" widescreen, with hardscreen and touchscreen options & 80mm height adjust
- **Certification**
Energy Star 6.1
- **System Dimensions (H x W x D)**
270 x 400 x 200mm
