

## Omnino 5

Stylish, compact and manageable, the Omnino 5 takes all-in-one computing to the next level.

Viglen Personal Computers are  
manufactured by XMA in the UK

The Omnino 5 is an integrated all-in-one PC from Viglen created with the benefit of three decades of design knowledge. Drawing on our own experience as well as listening closely to our customers' requirements, the Omnino 5 combines key vectors of performance, flexibility, style, manageability and value, resulting in a versatile computer that's equally suited to single-desk and whole organisation deployments.

## Performance

Based on proven technology from Viglen and Intel, the Omnino 5 harnesses the power of Intel® Core™ processors. The result is a scalable PC which can be deployed for multiple roles.

## Usable

We've created the Omnino 5 to be an effective desktop PC on everybody's desk. The integrated design features a 21.5" or 23" LED display which is as bright as it is power efficient without the need to increase the physical size of the chassis. Features such as the built-in webcam and integrated multimedia and WiFi make the Omnino 5 as easy for deployment as it is for your users.

## Multimedia

The Omnino 5 takes desktop multimedia to the next level with HD audio built into every system and dedicated stereo speakers providing a much clearer audio image than a single internal speaker. Intel HD graphics takes care of the visuals effortlessly and an accessible HDMI port means a second display can be enabled in moments.

## Value

The versatility of the Omnino 5 and its large display gives you access to tomorrow's computing, today. Our fully customisable design means you can specify exactly the components you need without paying for those you don't.

## Style

The toughened TFT display is not just eye-catching, but facilitates easy cleaning, while the body shell of the Omnino looks good, keeping components and cables secure and keeps fingers out. Manageability With support for Intel® vPro technology, the Omnino 5 promotes the key advantages of managed computing. You'll enjoy enhanced performance, manageability and security, without compromising the style and versatility of the Omnino 5.

## Flexibility

The Omnino 5 is based on industry standard thin mini ITX motherboards, giving the widest possible choice of processors and storage as well as integrated multimedia and connectivity. Select your preferred motherboard to optimise configuration for budget, manageability, performance or lifecycle without having to deploy different all-in-one PCs to meet your requirements.

## Secure

Your IT investment is important and keeping it secure is a primary concern. The Omnino 5 includes a Kensington-style security locking point and options for a desktop locking pillar as well as Viglen's flexible asset tagging and security services which mean that you can protect your investment without compromising access.

## Environment

An all-in-one PC offers a highly attractive environmentally-aware computing option, because the base unit and monitor operate from a single power supply, reducing the overall power consumption. The Omnino 5 goes a step further with T-series Intel® Core™ processors and an LED display, both designed to minimise power consumption. When combined with existing hardware and software power efficiency measures including Energy Star 5 certification, the Omnino 5 becomes an exemplary environmentally-aware PC.

## Specification

- **Chassis**  
Integrated form factor with 100mm VESA mounting
- **Processor**  
Choice of Intel Core i3, i5 and i7
- **Motherboard**  
Choice of Viglen thin mini-ITX boards
- **Operating System**  
Windows® 10, Windows 8 / 8.1, Windows® 7 Professional
- **Memory**  
Up to 32GB DDR4 or DDR3
- **Hard Drive**  
Range of HDD and SSD options
- **Audio**  
Integrated multichannel HD audio
- **Graphics**  
Integrated Intel® HD graphics
- **Network**  
Integrated Gigabit Ethernet  
802.11b/g/n WiFi (factory-fit option)
- **Optical Drive**  
Optional Slim DVD Writer Drive
- **Input**  
105-key USB keyboard and optical mouse with optional upgrades
- **Webcam**  
Integrated webcam in monitor bezel
- **Power Supply**  
120W AC adaptor
- **Security**  
**Standard:** Kensington locking point  
**Optional:** security pillar, asset tagging and security marking
- **Display**  
21.5 or 23 inches  
Native resolution: 1,920 x 1,080  
Brightness: 300cd/m<sup>2</sup>  
Contrast ratio: 1000:1  
Response Time: 5ms
- **Certification**  
Energy Star 6.1
- **System Dimensions (H x W x D)**  
320 x 520mm x 200mm
